

Canadian Council
on Invasive Species Conseil Canadien sur les
Espèces Envahissantes

The Canadian Council on Invasive Species
PRESENTS THE

Community Science Workshop

**SAVE THE
DATE!**

MARCH 4, 2020

**Early detection of invasive
species is key in
preventing their spread
and reducing their impacts.**

Often described as 'citizen' or 'community' science, organizations are coming together to leverage the public to help meet real world goals, such as tracking and reporting of invasive species.

Join the Canadian Council on Invasive Species, along with government, non-government, indigenous, business and industry organizations, to explore the current approaches to community science in Canada and beyond, and how we can work together to grow engagement across Canada to prevent the spread of invasive species.

Limited space available, details and agenda to follow.

**OTTAWA CONFERENCE
AND EVENT CENTRE**

The Canadian Council on Invasive Species Serves as a national voice and hub to protect Canada from the impacts of invasive species.
